

Welcome to the Career Multiverse

Career Lobster 🦞🔮 - Find Your Career Best Practice

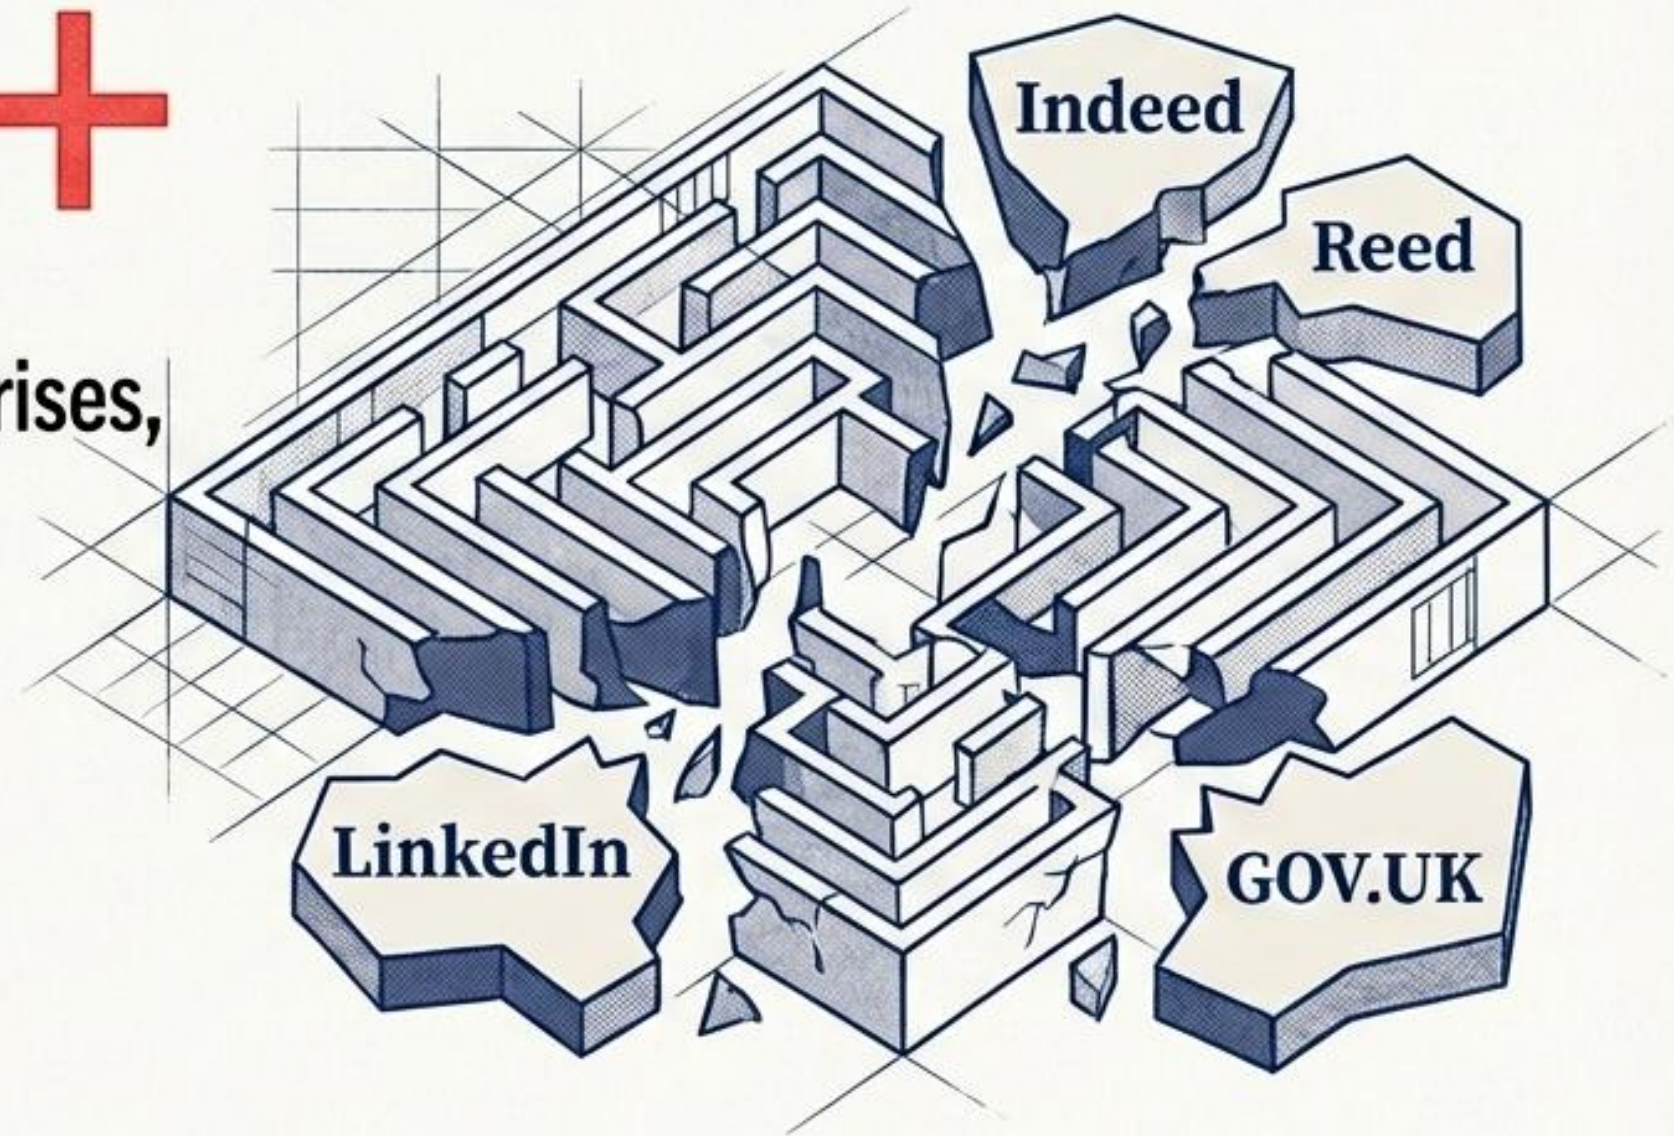

One Wrong Step, Lose Your Visa: The Hellish Difficulty of UK Jollish Difficulty.

140,000+

Number of UK government-registered enterprises,
only a very few can offer Visa Sponsorship.

£38,700

Strict Visa Salary Threshold.

Information is extremely fragmented; a single blind career choice could end your right to stay in the UK.

Breaking the Deadlock: AI Calculates the Optimal Parallel Universe Solution and Automates Execution.

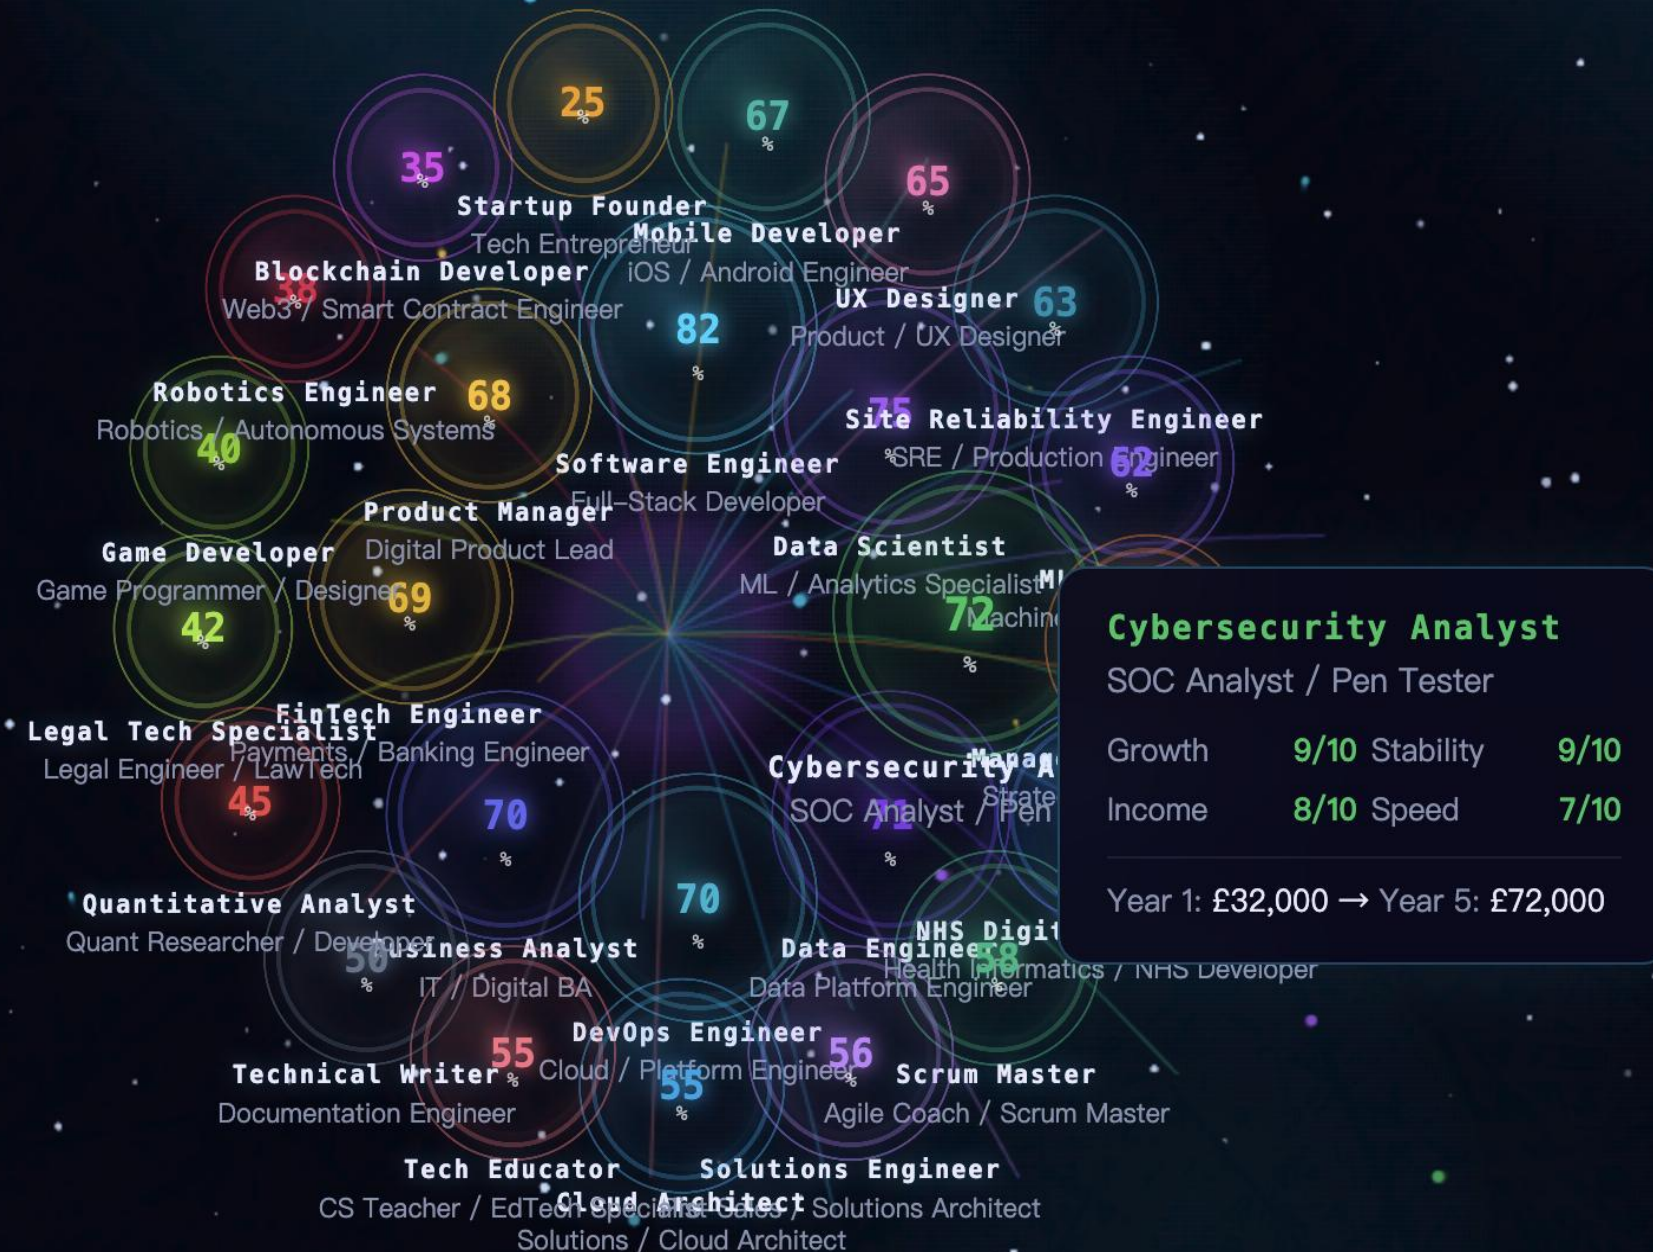

Career Lobster is not a consultant, but a Multi-agent AI system. It simulates thousands of career timelines, identifies the highest success path, and manages the entire closed loop from job search to application.

Multi-Agent Collaboration: 5 Exclusive “Lobster Assemts” Assemble.

Based on the OpenClaw infrastructure, driven by 3 specially selected Z.AI GLM models, each performing its specific duty.

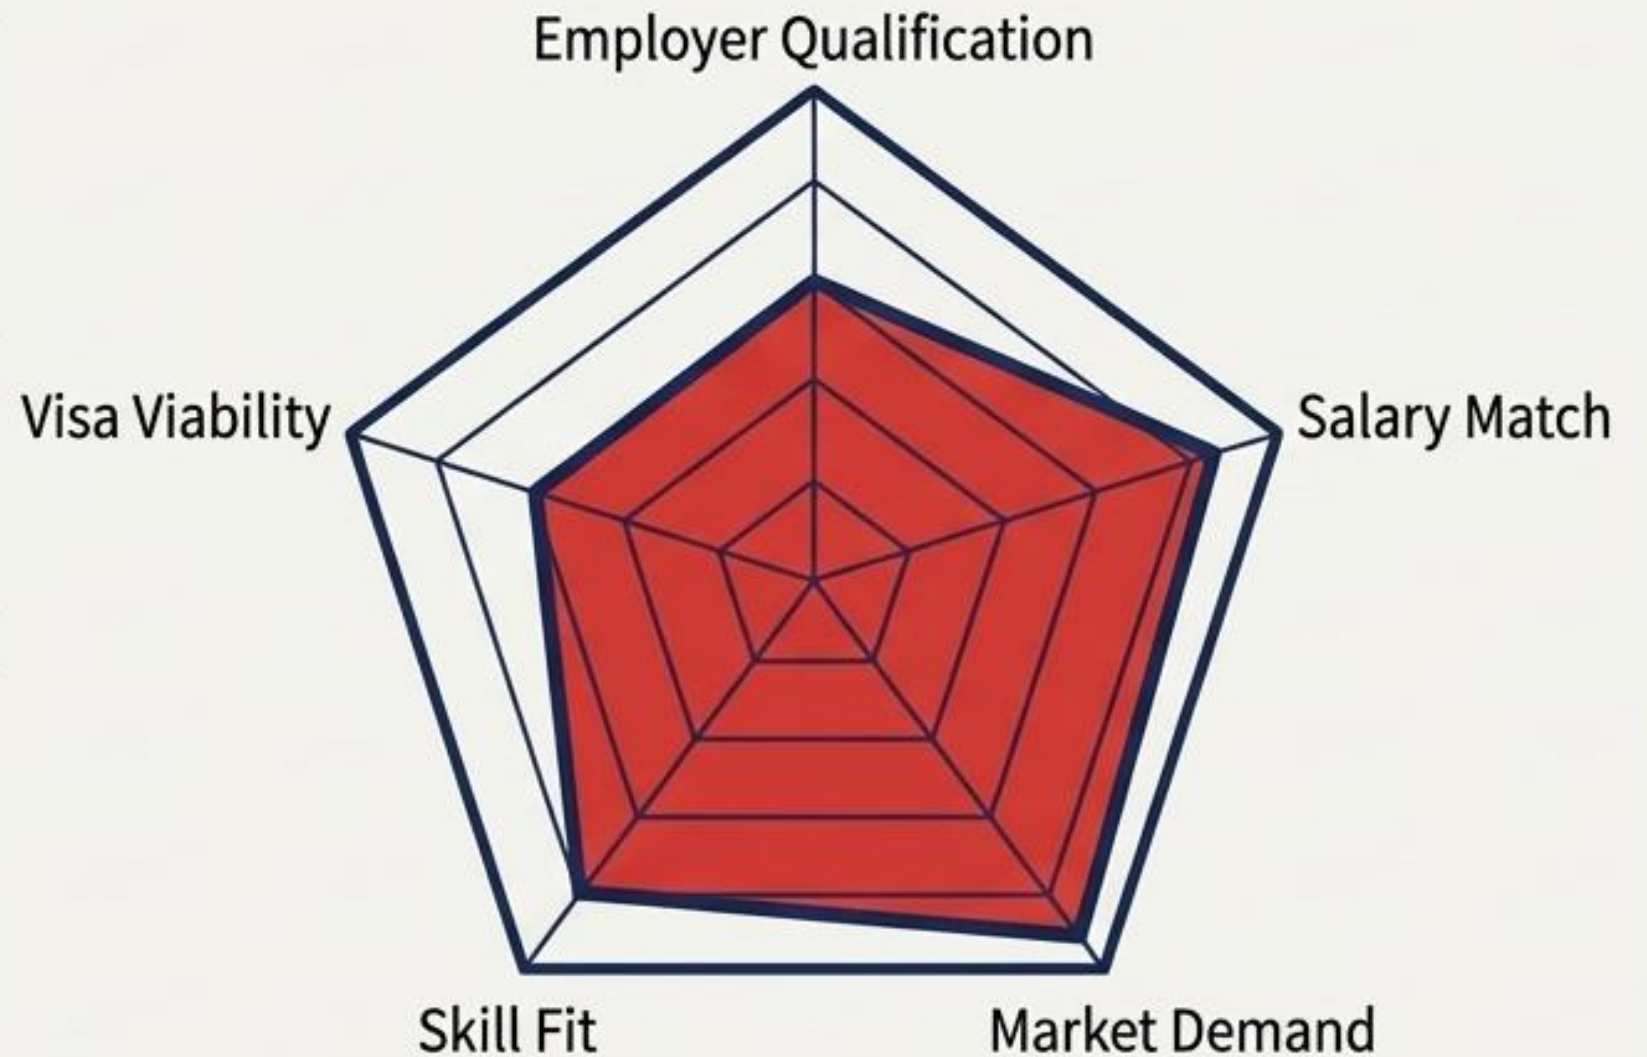

Simulator (Simulator **Lobster**)

Function: Calculates thousands of parallel career timelines, outputting the path with the highest success rate.

Model Equipped: GLM-4.7

Model Advantage: Requires extremely strong structured reasoning and multi-step logical analysis capabilities to handle complex cross-dimensional weighted scoring and probability calculations.

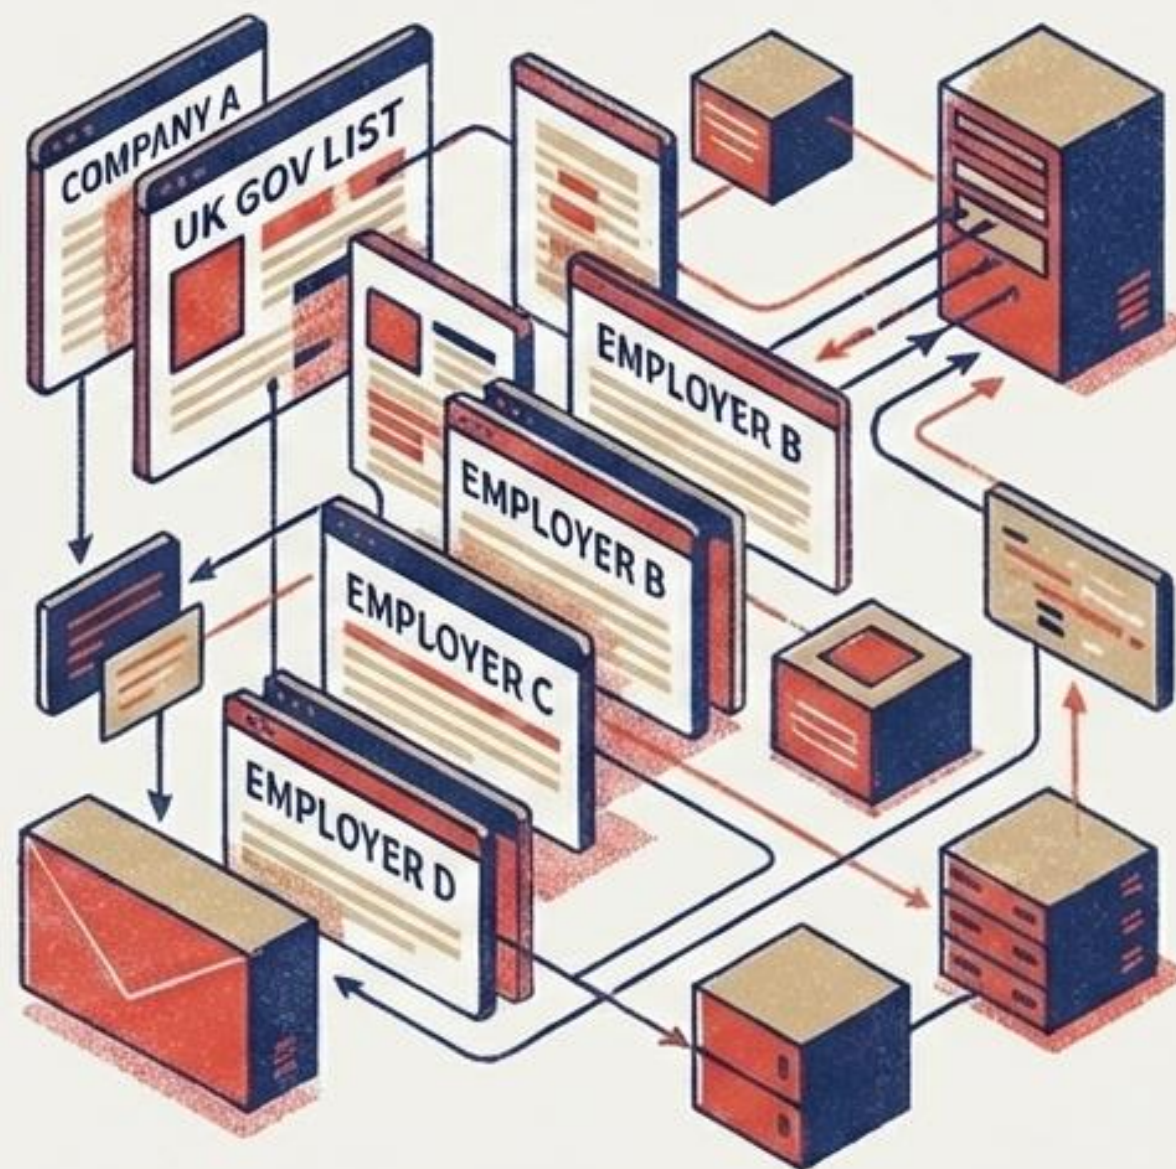

Scout Lobster

Function: Browser automation concurrently searches Indeed, Reed, LinkedIn, and performs sub-second cross-referencing with the UK Government Licensed Sponsors Register (140,000+ employers).

Model: GLM-4.7-Flash

Model Advantage: Optimized for extreme processing speed. Focuses on high-concurrency web HTML structured data extraction and rapid list validation.

Builder Lobster

Function:

Reverse engineer high-frequency UK interview keywords, generate UK standard resumes and cover letters, strictly adhering to the "Equality Act" (no photos, no date of birth, no visa status).

Model:

GLM-5

Model Advantage:

Z.AI's most powerful generative model. Every word on the resume is critical, offering ultimate text texture and precise wording comparable to top career consultants.

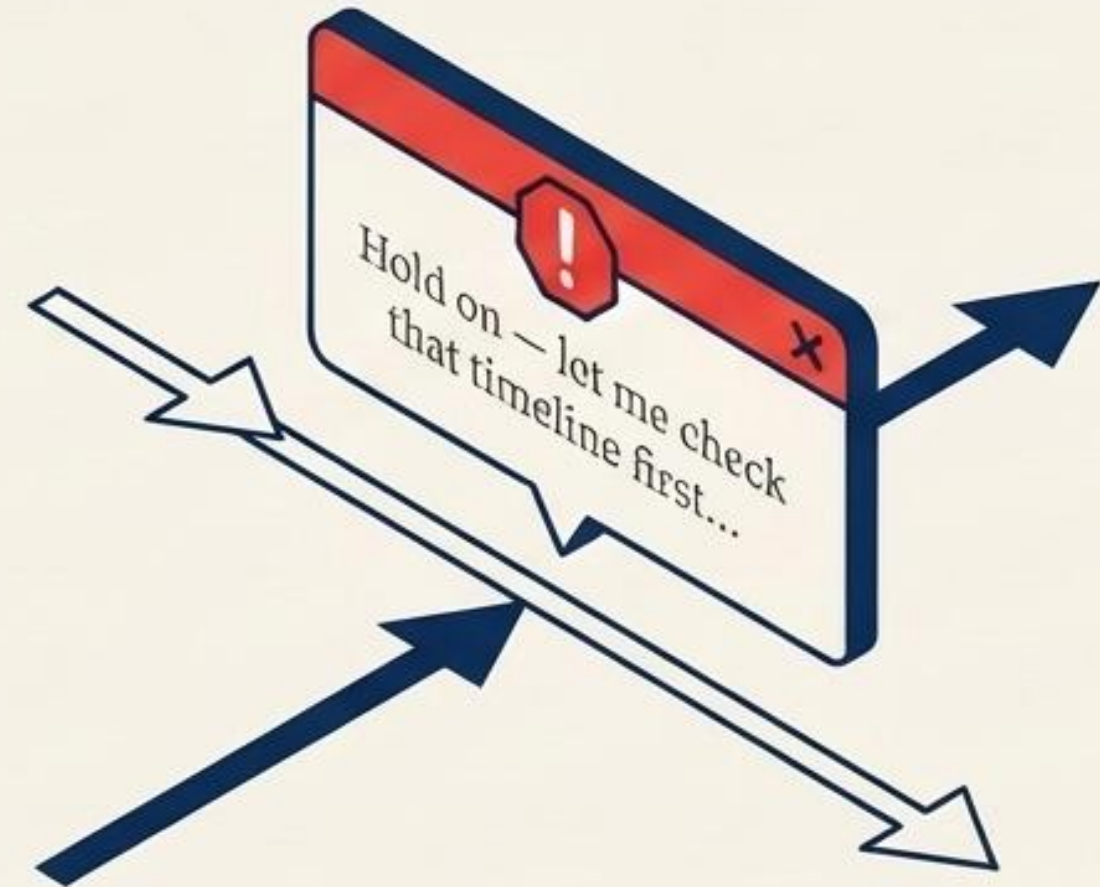

Orchestrator (Orchestrator Lobster)

Function: Orchestrates the overall process and acts as a timeline interceptor. When a user attempts to apply for a high-risk position with a success rate $<40\%$, it immediately intervenes, provides better alternatives, and requires human confirmation to proceed.

Model: GLM-4.7

Model Advantage: Perfect sense of balance. It has both a sufficiently fast response speed to maintain real-time conversational flow and enough reasoning depth to assess job probabilities in real-time.

Evolution Engine (Self-Improvement)

Function:

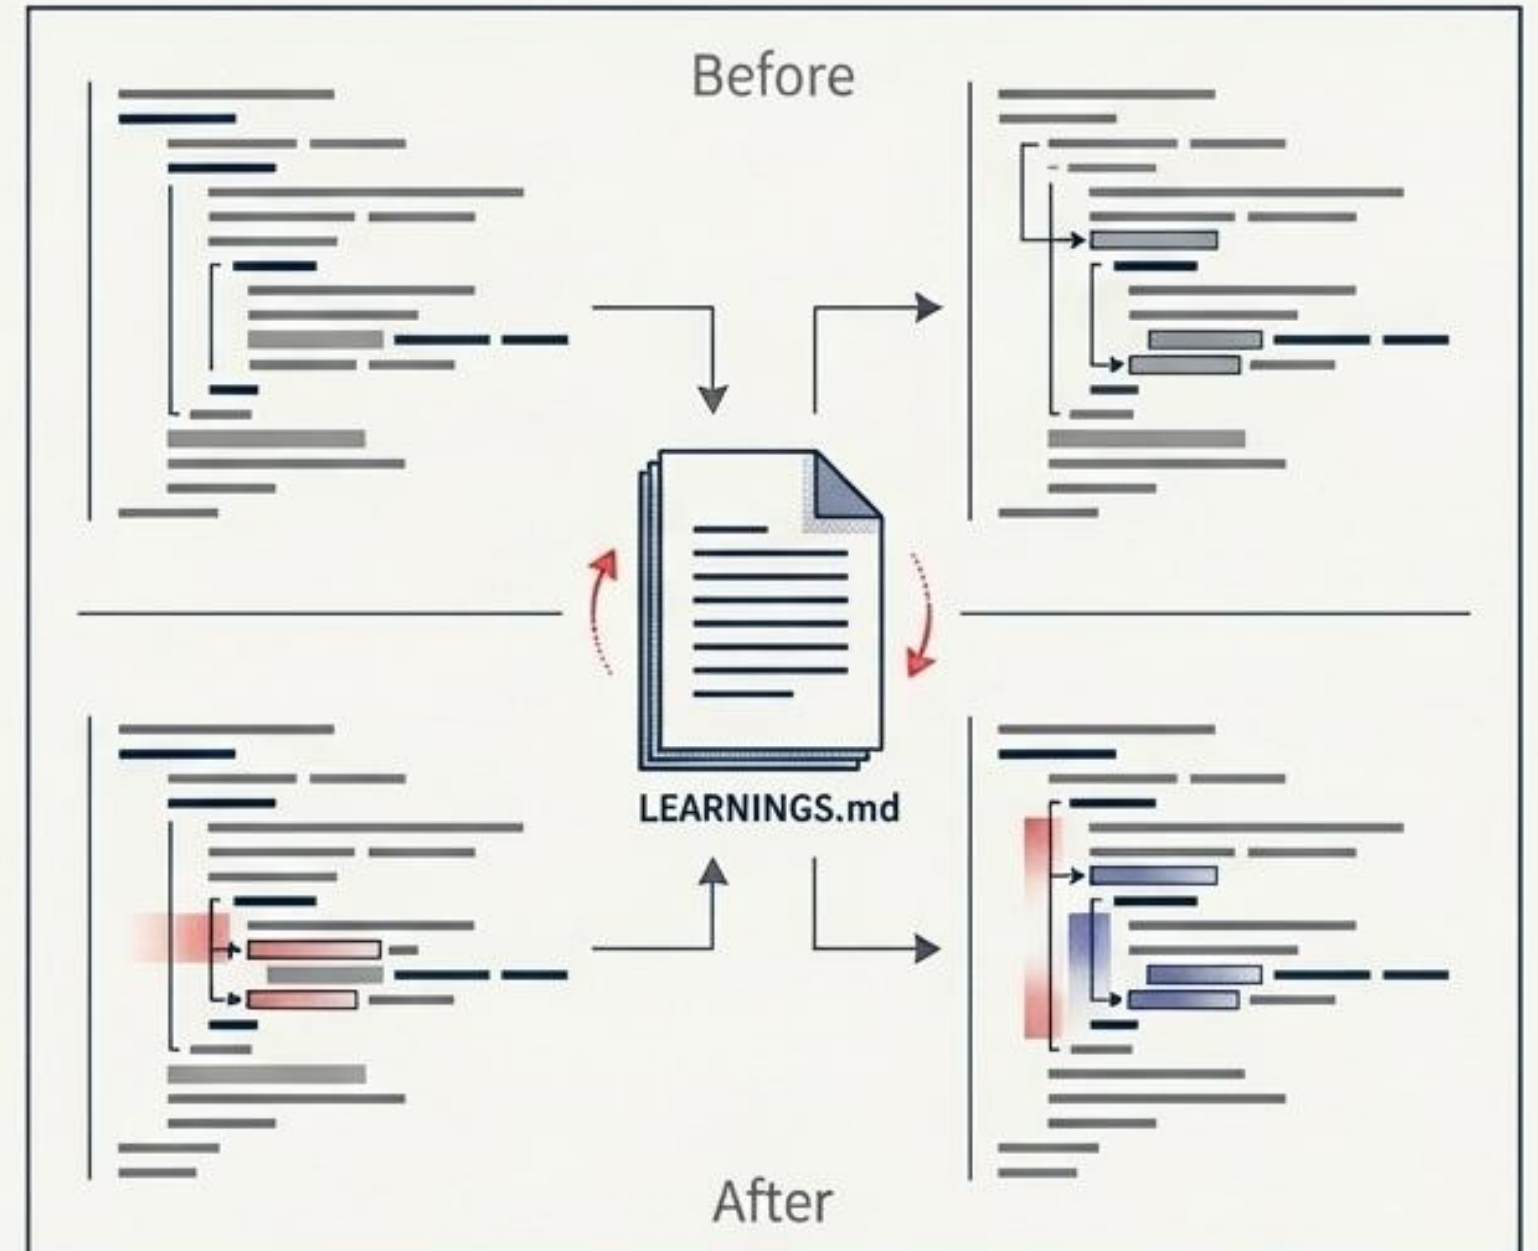

Performs Delta analysis. Compares predictions with real results, self-corrects weights, and solidifies experience into the LEARNINGS.md file for cross-session learning.

Model Loaded:

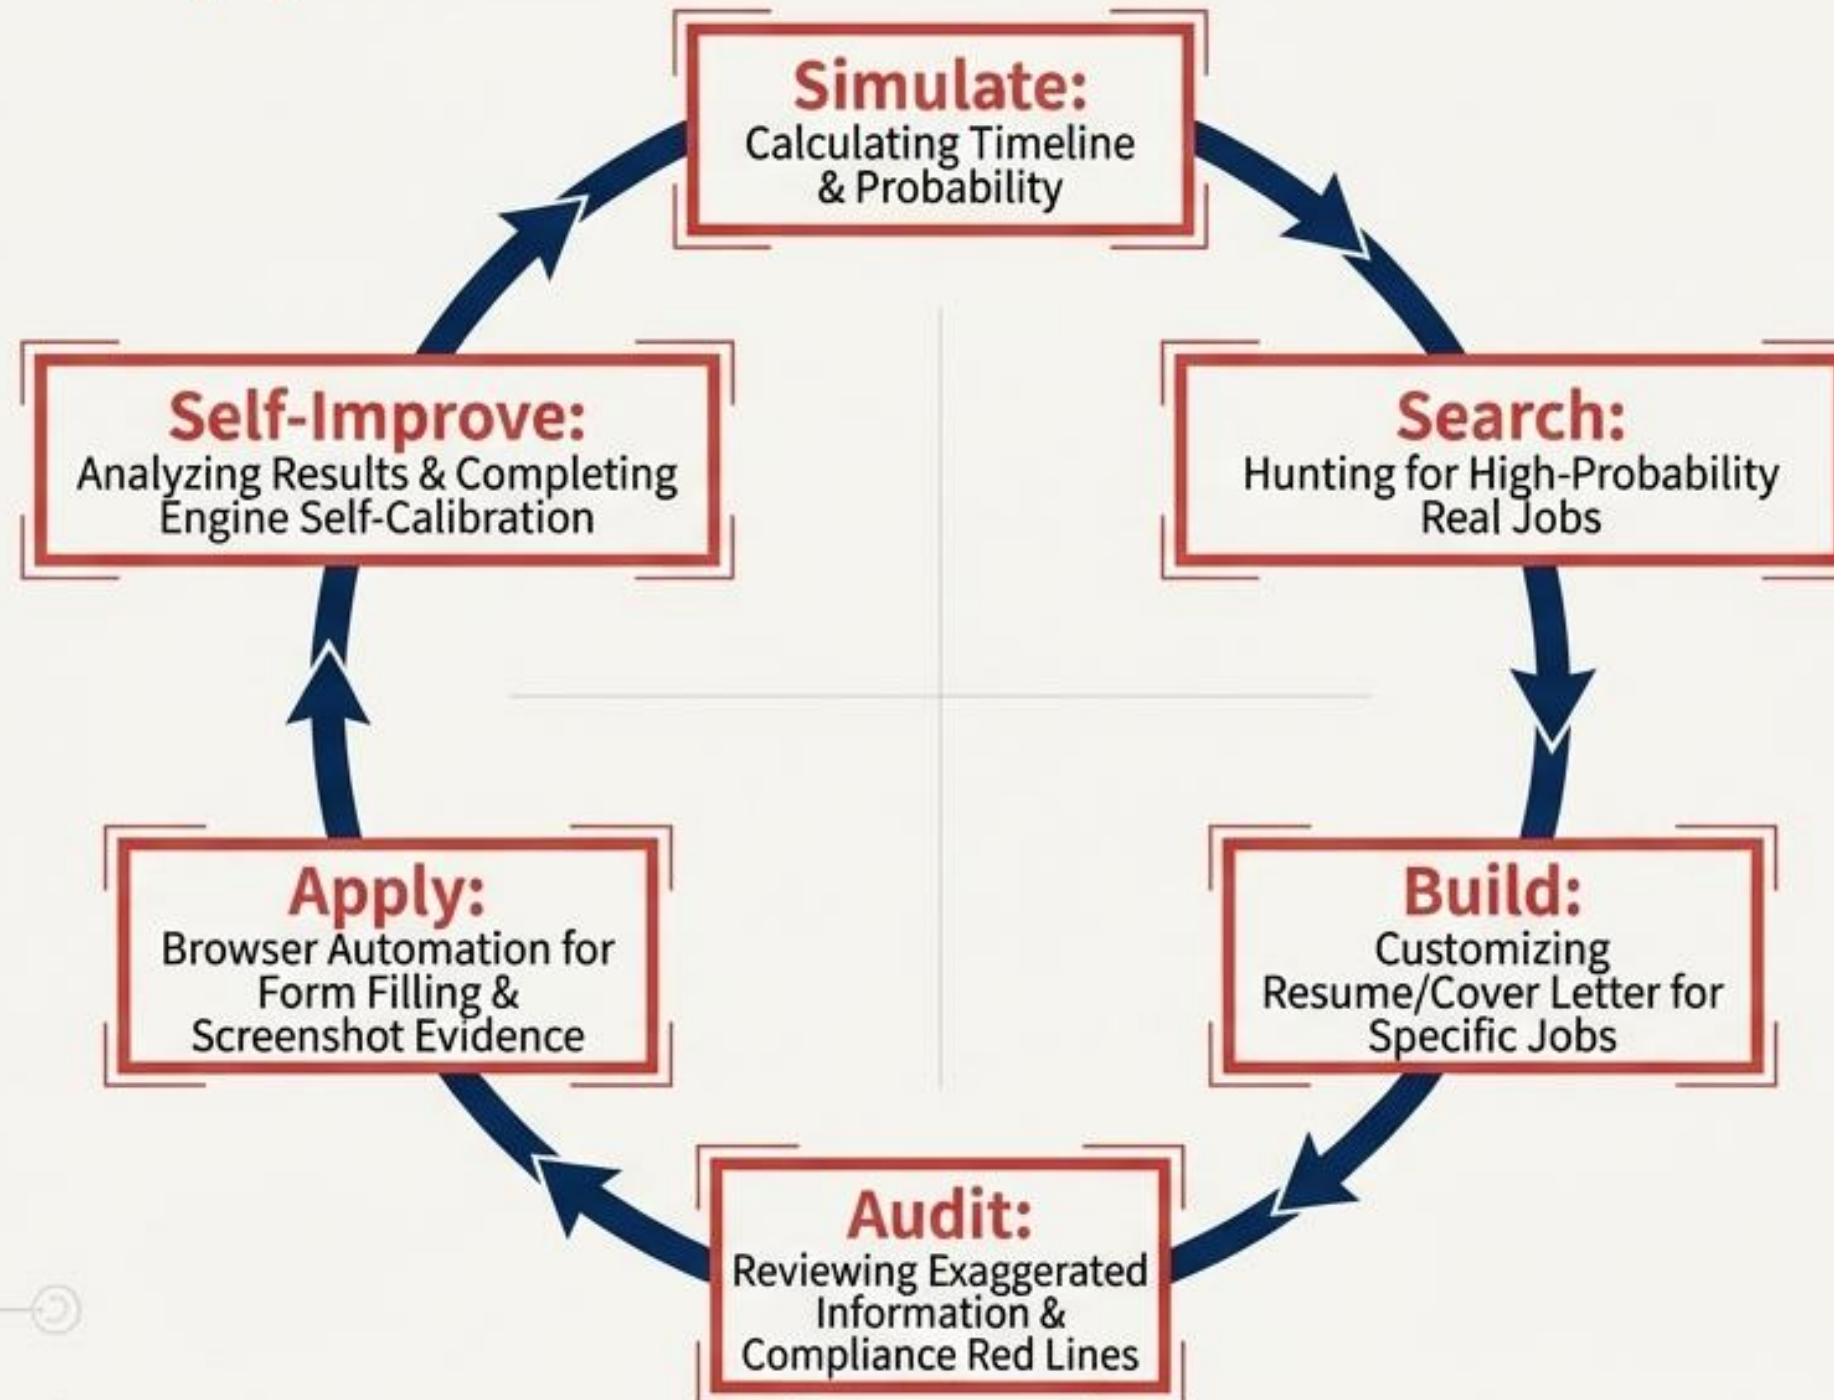

GLM-4.7

Model Advantage:

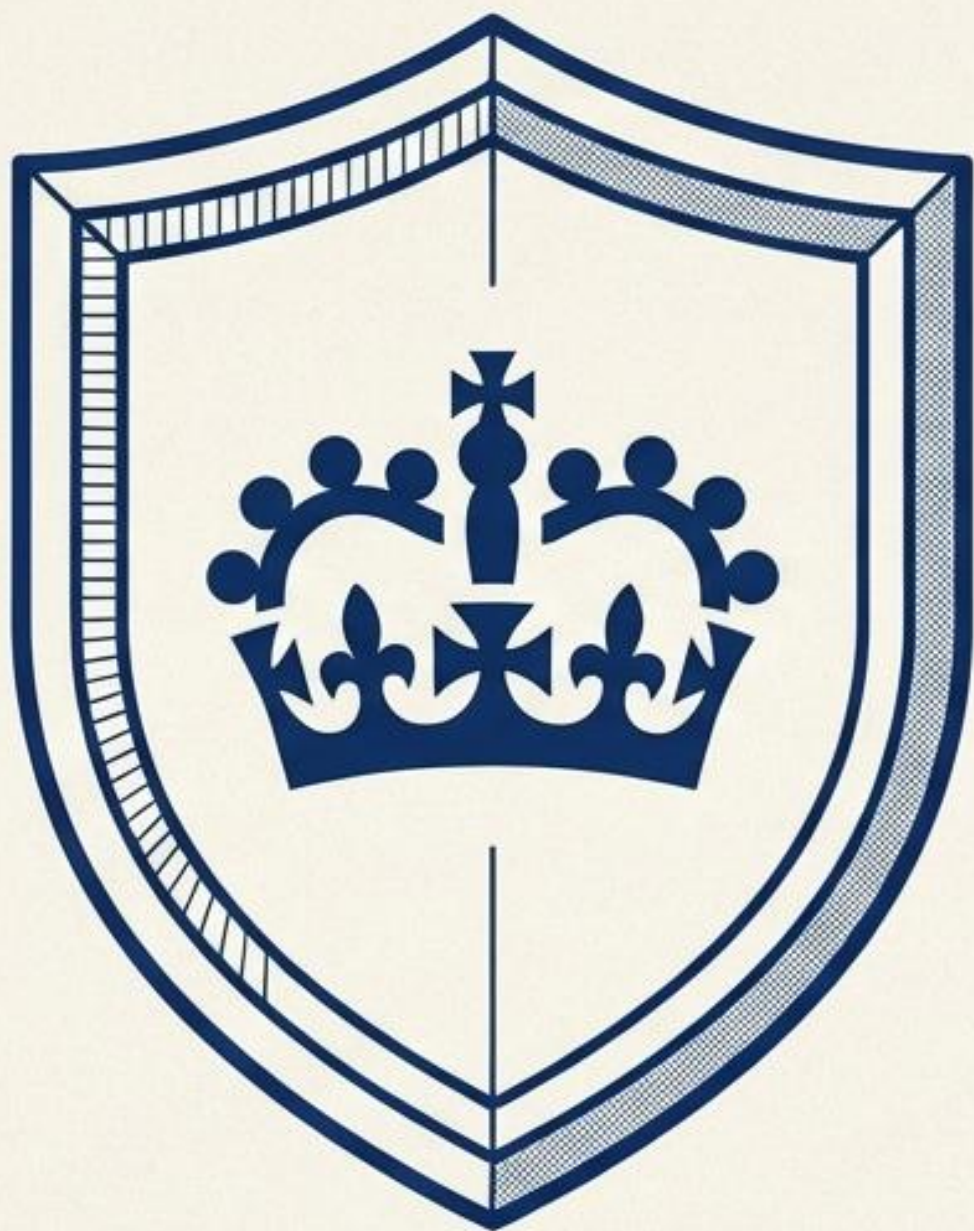

Excellent long context understanding capability. Can simultaneously maintain two simulation results in context for deep, systemic comparative reflection.

A Complete Career Flywheel: From Confusion to Automated Application

Refuse Hallucinations, A Absolute Truet of Data Moath.

Local Direct Government Data: Real-time query of 140,000+ UK government licensed employers registry, eliminating false Sponsorship promises.

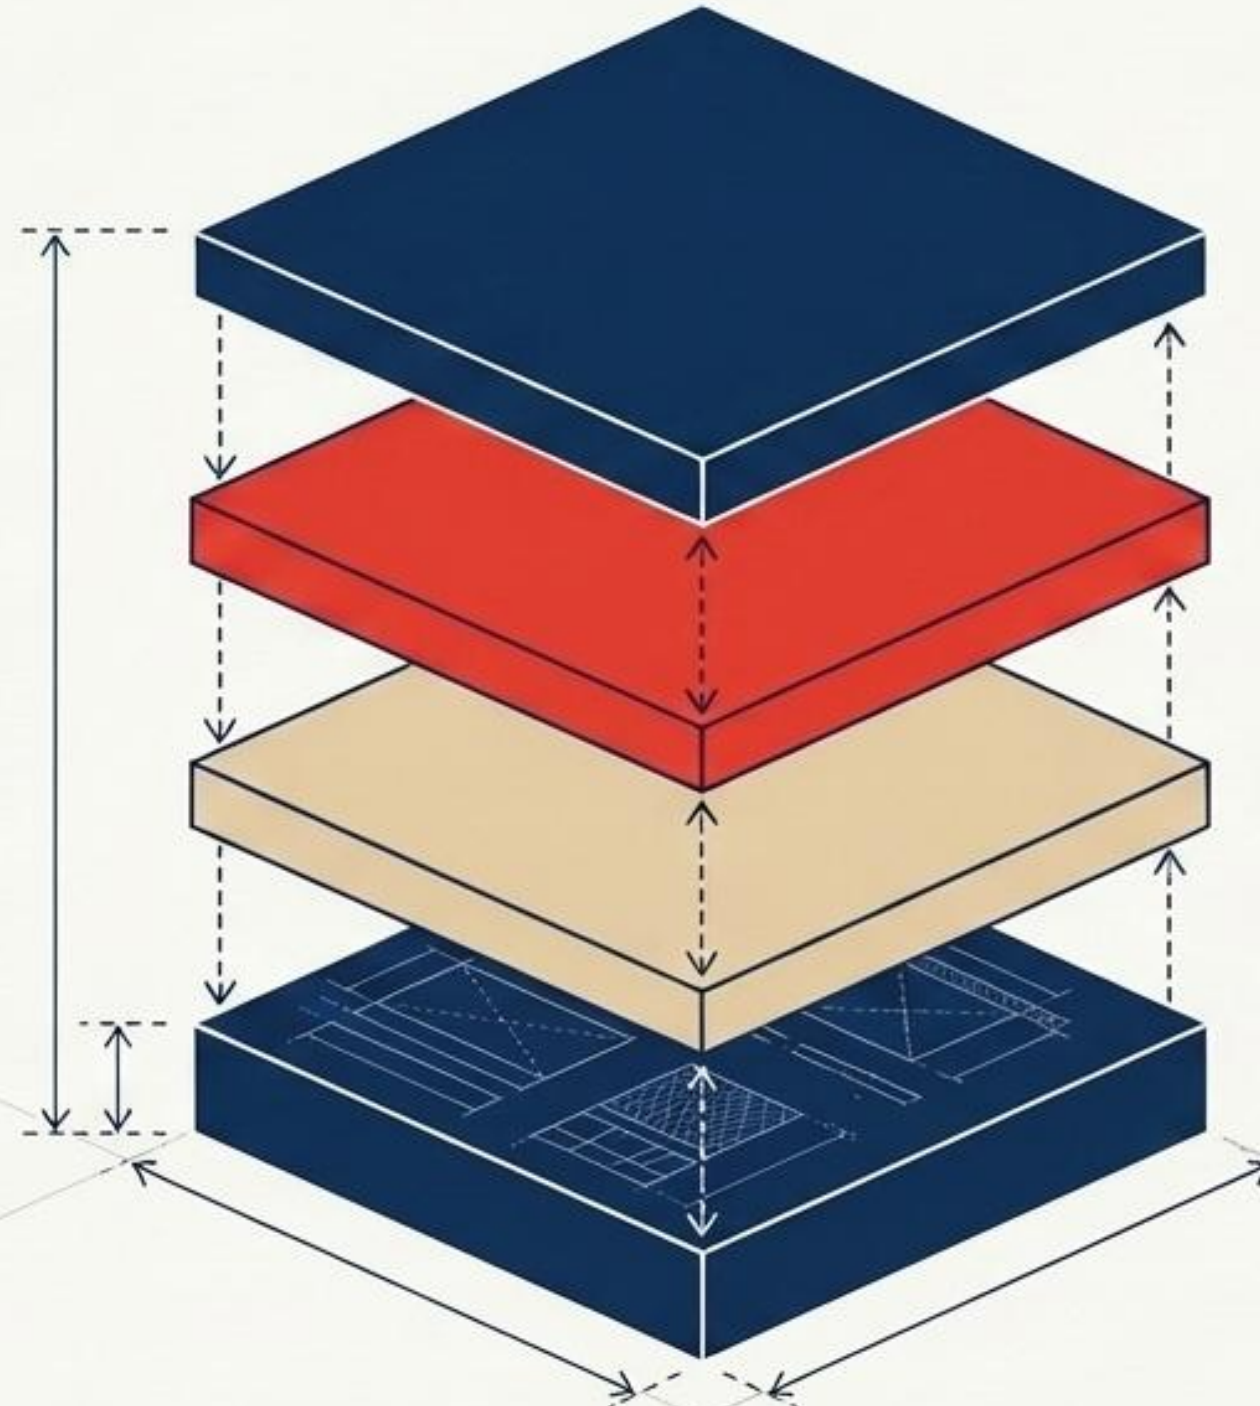

Honest Confidence System: Refuses blind fabrication when data is insufficient, actively prompts Low Confidence and uses interval.

5-Dimensional Weighted Truth Signals: Each score is based on real market feedback.

Underlying Technology Landscape Powering the Multiverse.

Interaction Layer:
Native Integration for WebChat & Telegram

Model Layer (Z.AI GLM via OpenRouter):
GLM-5 (Text Generation),
GLM-4.7 (Reasoning/Scheduling),
GLM-4.7-Flash (Rapid Extraction)

Data Layer:
Dynamic Retrieval from GOV.UK
Sponsorship Database

Framework Layer:
OpenClaw Multi-Agent Orchestration

Who Needs Career Lobster?

International Graduates

Desperate job seekers transitioning from PSW visa to Skilled Worker visa.

Career Changers

Professionals needing to change jobs while maintaining visa Sponsor status.

Cross-border Job Seekers

Anyone needing navigation for UK work rights and visa sponsorship paths.

Roadmap

Every AI-generated career multiverse is a metered intelligence event (Traced by Anyway)

Our mission is to democratise career excellence — we believe every person deserves to discover their own Career Best Practice, not just those with elite networks or expensive advisors.

Welcome to the Career Multiverse.

Find your best timeline.
